

Market Trend

The week end flat for SOFIX and with 2.30% increase for BG40. The price-weighted index added the same percent for the entire September with the support of its components, whereas the main market indicator lost 1.73%. The indices were restructured during the month, which influenced their performance.

October probably will begin without significant movement. Until the end of the month should be place the non-consolidated 3Q 2010 financial reports. The touristic companies and the export-oriented businesses will attract the attention.

Trading Activity

Institutional investors remained the leading market's participants during the month. The block deals formed the largest part of the turnover. On Wednesday, 22.5% of the capital of the low-liquid Kauchuk (4KU), part of Chimimport's structure, were transferred. Among stocks in focus Corporate Commercial Bank (6C9) and Sopharma (3JR) hold the investor's attention. The institutional interest will have short-live effect on the market's activity.
