

SPEEDY
INDUSTRY: COURIER SERVICES
DELIVERING ON PROMISES

THE LEADING COURIER COMPANY IN BULGARIA, SPEEDY, FINALIZED LONG AWAITED EXPANSION WITH THE NEW STRATEGIC PARTNER OF GEOPOST AND IS FIRMLY MARCHING TO DELIVER WHAT IT PROMISED. E-COMMERCE AND INTERNATIONAL DELIVERIES GAVE A BOOST TO Q3 SALES WITH THE ONGOING COST RESTRUCTURING PLAYING ON MARGINS.

SOLID SALES GROWTH DESPITE POLITICAL TURBULENCE IN BULGARIA

Speedy's sales increased by 17% in Q3 thanks to flourishing e-commerce, pallet and international deliveries and despite the political and banking instability in Bulgaria in June and July. The latter negatively affected the economic activity in the country due to the fall of the 2nd government in the last 12 months and the collapse of the 4th largest bank. Nevertheless, the new pallet and international delivery services together with the booming e-commerce grew by 20%+ and with the overall economic activity rebounding in August and September Speedy grew as expected.

ONGOING COST RESTRUCTURING PLAYING ON MARGINS

The ongoing cost restructuring program via outsourcing of transportation led to a major cost reshuffling with significant material and labor costs decrease and major external services costs increase. The aim of the program is enhancing operational flexibility and increasing workforce loyalty - 2/3 of the Company's couriers already work as subcontractors. The program is expected to take full effect in 2015 and coupled with the new services to the low-margin-high-growth Romanian market is already playing on margins. EBITDA margin declined to 17% while net income margin narrowed at 11%.

CAPITAL INCREASE AND EXPANSION PLANS DELIVERED AS PROMISED

In November, Speedy successfully increased its share capital and finalized its strategic agreement with Europe's 2nd largest courier company GeoPost, part of the French La Poste. The agreement entailed, on the one hand, Speedy acquiring GeoPost' subsidiaries in Bulgaria and Romania and, on the other hand, GeoPost acquiring 25% of Speedy. Both acquisitions were finalized in mid-November so first effects on the Company's financials expected in Q4. The deal will boost Speedy's presence in Romania, 3x larger market than Bulgaria, allowing it to offer integrated courier services in both countries. The Company started offering pallet services to Romania at the price of Bulgarian deliveries in September, increasing international sales to 8.2% of revenues.

VALUATION/RISKS

VALUATION: We keep our BGN 38.43 1 YTP as Speedy's Q3 results are in line with our expectations. Our valuation is based on a DCF model that includes GeoPost's business in Bulgaria and Romania.

RISKS: Additional political instability may affect economic activity; Logistics outsourcing may not prove as efficient as planned; Increased competition, especially in the B2C segment may put pressure on margins; Low free float;

FINANCIAL RESULTS REVIEW

Speedy's consolidated financial results in Q3 2014 substantiate the Company's resilience and potential to deliver on plans.

Sales grew by 17% due to booming e-commerce and new B2B services

Sales increased by 17% in Q3 2014, in line with our expectations for organic growth, due to the 20%+ increase in the new pallet services to business clients, further development of international deliveries to neighboring Romania and booming e-commerce in Bulgaria. Pallet and international deliveries grew by 24.9% with the latter already accounting for 8.2% of total revenue. The e-commerce segment, although offering lower margins, added 23% in the last quarter. Overall domestic sales in Bulgaria grew by 14.5% due to the political and financial instability at the start of the summer. The fall of the 2nd government in the last 12 months together with the collapse of the 4th largest bank – Corporate Commercial Bank (6C9 BU), slowed economic activity in the country in June and July. A rebound was evident in August and September and with the new government taking charge in November, the economic activity in Bulgaria is set to stabilize. This coupled with the better growth prospects in Romania should support Speedy's performance.

Significant increase (49%) in other revenues (5% of total sales) also added to the overall strong sales performance of Speedy in Q3. The boost in other revenues came from the Company's ongoing cost optimization and restructuring program that entails outsourcing most of the transport services. As part of the program, Speedy sells older or rents newer cargo vehicles. The Company outsources most of its transport services, thus lowering material costs but increasing external services costs. It also motivates its own couriers to become subcontractors, again transferring labor costs to external services costs. The overall goal is to increase operational flexibility and workforce loyalty. Currently, 2/3 of its couriers are subcontracted and some transport services between its distributions centers in Bulgaria are carried out by third parties, some related to the majority shareholder.

In Q3, material costs were down by 22% due to 36% lower fuel costs, labor costs decreased by 7% while external services expenses were 80% up as the cost restructuring program kicked in. The workforce declined by 21% y-o-y to 885 people but overall labor costs registered a smaller decline as Speedy made a 5% wage increase in July and restructured its bonus payment system to even out labor costs over the year.

The overall effect from the optimization program is a major cost structure reshuffle with materials and labor expenses' share declining from 40% to less than 30% of sales while external services' share increasing from 26% to 45%. The full effect of the program should be evident in 2015, however, the picture will be blurred due to the acquisitions in November.

TTM EBITDA margin narrowing at 17%

Naturally, the cost restructuring affected Speedy's profitability. In line with expectations, EBITDA margin dropped to 19% for the nine months of 2014 versus 24% for the same period last year. On a TTM basis EBITDA margin narrowed to 17% and we expect it to stabilize at 16% as international deliveries (Romanian market larger but more fragmented) and e-commerce segments offer lower profitability. Overall net profit margin narrowed at 11% which is both in line with the Company's historical average and with our expectations. It was also affected by the higher depreciation expense as Speedy renew most of its fleet in 2012 and 2013.

Heading into Q4, we would see the effects of Speedy's expansion program together with GeoPost, as the acquisitions of DPD Romania and GeoPost Bulgaria will affect both the top and bottom line of the Company. The bottom line will be also affected by the long term debt used to finance the acquisitions. We have incorporated the new capital structure into our initial Speedy valuation.

Q4 results to be affected by recent acquisitions

An issue to be monitored is the continuing related parties' receivables and transactions' effect on Speedy's operations. At end of September 2014, the former increased slightly (2%) to BGN 3.7m. The majority of this figure is a BGN 3.1m long-term investment loan lent to Bulprom Gas 2006 that is controlled by Speedy's majority shareholder. The loan is due at the end of 2017 and is extended at market rates i.e. 6% interest. Also, Speedy outsources some of the transport services between its distribution centers to another related party – Transbalkan Group. The services acquired from this party increased twofold y-o-y to BGN 6.2m as of Sept. 30th, 2014.

Related parties transactions to be closely monitored

CAPITAL INCREASE AND GEOPOST AGREEMENT EXECUTED

In mid-November, Speedy successfully increased its registered share capital from BGN 4.4m to BGN 5.35m via the issuance of 889K new shares at an issue price per share of BGN 23. The capital increase was part of the preliminary agreement between Speedy and GeoPost announced in Spring 2014. On the one hand, the agreement prescribed GeoPost to acquire 25% of Speedy by the end of 2014 with an option for a majority stake in 2020 at 8x EV/EBITDA multiple. On the other hand, Speedy had to acquire GeoPost's businesses in Bulgaria and Romania (GeoPost Bulgaria and DPD Romania).

All transactions were finalized in November with GeoPost buying 25% of Speedy (part of the stake acquired directly from the majority shareholder Speedy Group and the other part acquired via the capital increase). Thus, currently Speedy Group, controlled by the founder and CEO Mr. Valeri Mektupchian, owns 66.11% of Speedy while GeoPost has 25%. The rest is free float, distributed among local and international institutional and individual investors.

COMPANY PROFILE

Speedy was established in 1998 and currently is the largest courier company in Bulgaria with 37% market share. It is also the 2nd largest postal service provider after the incumbent Bulgarian Post.

Speedy is one of the fastest growing companies in the country with high brand recognition. Its core business is door to door standard and express delivery services that represent 95% of the revenues during the past three years. The B2B segment contributes the most the Company's revenues, but B2C is advancing fast as well.

In the spring of 2014 Speedy has signed an agreement with Europe's 2nd largest land courier service provider GeoPost SA, part of the French La Poste Group. According to the agreement, GeoPost acquired 25% of Speedy and has an option for 70% in 2020. Both transactions to be executed at an EV/EBITDA multiple of 8x. On the other hand, as part of the agreement, Speedy acquired GeoPost's business in Bulgaria and Romania and will manage the new bigger structure. The execution of the agreement was finalized in November 2014 with GeoPost acquiring 25% of Speedy, partially via an increase of Speedy's registered capital.

FUNDAMENTAL STORY

Speedy has gone through the economic crisis with flying colors thanks to its integrated and innovative product range, flexible operations, skillful management and solid market presence.

The Company adapts fast to market opportunities with innovative products offering both B2B logistics outsourcing services for supply-chain-optimization and B2C delivery services via a wide range of small pickup points all over the country. It also provides door to door deliveries.

By joining forces with GeoPost and its DPD network, Speedy will develop its regional expansion goal. It is starting in Romania – a 3x larger but more fragmented market. The Company started offering delivery services to the country in September 2014 as though it is Speedy's domestic market.

STRENGTHS & OPPORTUNITIES

- Good corporate governance
- Clear dividend policy
- Solid market position in Bulgaria
- Integrated product range
- High growth potential with booming e-commerce
- Excellent brand recognition

SHAREHOLDERS' STRUCTURE

DOUBLE DIGIT GROWTH TO CONTINUE

WEAKNESSES & THREATS

Risks for Investors: Information in this document should not be regarded as an offer to buy or sell any financial instruments. The investment possibilities discussed in this document may not be suitable for certain investors depending on their specific investment objectives and time horizon or in the context of their overall financial situation. In particular, the risks associated with an investment in the securities or the financial instruments under discussion are not explained in its entirety.

The prices or values of the securities may go down as well as up and can fluctuate and fall against the investor. The securities or investments may cause the investor to lose the amount invested. Past performance is not a guide to future performance. Changes in exchange rates may have an adverse effect on the value, price or income of the securities or investments.

Valuation Methods: Company valuations are based on the following methods: multiple-based (P/E, P/B, EV/EBITDA), historical valuation approaches, peer comparisons, discount models (DCF, DDM) or asset-based evaluation methods. Valuation models are dependent on macroeconomic factors, including interest rates, foreign exchange rates, prices of raw materials, and any expectations about the economy, the market sentiment. The valuation is based on expectations that might change rapidly and without notice, depending on developments specific to individual industries and countries. Recommendations and target prices derived from the models might therefore change accordingly. The application of models depends on forecasts of a range of economic variables, thus there is a range of reasonable variations within models. Any valuation is dependent upon inputs that are based on the subjective opinion of the analysts carrying out this valuation.

Recommendations: Analyst(s) recommendations are based on the specific factors for the company, sector, country and global developments, as compared to market indices. Recommendations and opinions reflect ELANA Trading's expectations over the 12-month period following publication from the perspective of long-only investment clients. ELANA Trading reserves the right to express different or contrary recommendations and opinions for different timescales or for other types of investment client. Except as otherwise noted, expected performance over next 12 months vary for different recommendations for Bulgarian stocks as follows:

BUY	More than 5% higher as compared to SOFIX and BG40 performance
HOLD	Market performance, +/-5% as compared to SOFIX and BG40
SELL	More than 5% lower as compared to SOFIX and BG40 performance

Frequency of Recommendations: No schedule of recommendations is available. The frequency of recommendations depends on specific factors to individual companies and the opinion of the analyst(s) for the necessity of minor or major changes.
