### Stock Price of First Investment Bank

- The report of First Investment Bank (FIB) did not surprise the market. The net profit for 2008 is BGN 51 million or an increase of 1.73% as compared to 2007. The results remain also unchanged on quarterly basis. The growth rate of the profits is deteriorating due to the stable level of assets during the whole year.

- Total assets were hardly changed during 2008 BGN and stood 4.2 billion at the end of the year. The decrease of the balance sheet during the first quarter was due to the payment of 3-year Eurobonds for BGN 200 million. It was compensated by the rising deposits through the course of the year and new syndicated loan for EUR 65 million in June 2008. The bank's credit portfolio jumped by BGN 178 million to BGN 2.9 billion at the end of 2008. Corporate clients had the largest share in the credit portfolio – 71%.

- Deposits of households are almost unchanged during the quarter as they increased by BGN 3 million. The largest part of deposits is in euro. The rising interest rates on deposits also contributed for the increase of liabilities. The rumors of insolvency problems of FIB during the second quarter had negative impact on the balance sheet but was overcome during the last quarter of 2008. The liquidity ratio of FIB was 26.3%.

- The price per share of FIB continued to drift lower before and after the report. However, the multiples are too low when compared to other Bulgarian public traded banks. Price to assets ratio is 0.03, whereas P/B is 0.39. The stock fell more than 50% year-to-date, which made the bank the worst performing position among the liquid stocks.

**Risks for Investors:** Information in this document should not be regarded as an offer to buy or sell any financial instruments. The investment possibilities discussed in this document may not be suitable for certain investors depending on their specific investment objectives and time horizon or in the context of their overall financial situation. In particular, the risks associated with an investment in the securities or the financial instruments under discussion are not explained in its entirety. The prices or values of the securities may go down as well as up and can fluctuate and fall against the investor. The securities or investments may cause the investor to lose the amount invested. Past performance is not a guide to future performance. Changes in exchange rates may have an adverse effect on the value, price or income of the securities or investments.

**Valuation Methods:** Company valuations are based on the following methods: multiple-based (P/E, P/B, EV/EBITDA), historical valuation approaches, peer comparisons, discount models (DCF, DDM) or asset-based evaluation methods. Valuation models are dependent on macroeconomic factors, including interest rates, foreign exchange rates, prices of raw materials, and any expectations about the economy, the market sentiment. The valuation is based on expectations that might change rapidly and without notice, depending on developments specific to individual industries and countries. Recommendations and target prices derived from the models might therefore change accordingly. The application of models depends on forecasts of a range of economic variables, thus there is a range of reasonable variations within models. Any valuation is dependent upon inputs that are based on the subjective opinion of the analysts carrying out this valuation.

**Recommendations:** Analyst(s) recommendations are based on the specific factors for the company, sector, country and global developments, as compared to market indices. Recommendations and opinions reflect ELANA Trading's expectations over the 12-month period following publication from the perspective of long-only investment clients. ELANA Trading reserves the right to express different or contrary recommendations and opinions for different timescales or for other types of investment client. Except as otherwise noted, expected performance over next 12 months vary for different recommendations for Bulgarian stocks as follows:

---

<b>Outperform</b>	More than 5% higher as compared to SOFIX and BG40 performance
<b>Market Perform</b>	Market performance, +/-5% as compared to SOFIX and BG40
<b>Underperform</b>	More than 5% lower as compared to SOFIX and BG40 performance

---

**Frequency of Recommendations:** No schedule of recommendations is available. The frequency of recommendations depends on specific factors to individual companies and the opinion of the analyst(s) for the necessity of minor or major changes.
