

MARKET REACTION TO EARNINGS

The announced corporate earnings for 2007 had little impact on prices of liquid shares. Although profits were in line with the expectations for solid growth, the market remains focused on the negative effects from foreign markets and the credit crunch. We cannot put all stocks under the same general conclusion for solid growth and improvement of profits. Companies with positive earning surprises will outperform the market in mid-term perspective. Moreover, Bulgarian stocks are more attractive in terms of multiples and growth perspectives as compared to the previous two years.

Company

Albena /ALB/ *

The non-consolidated report showed the same positive trend that began during the third quarter. The changes in the accounting method resulted to understated sales during the current quarters as compared to previous periods. Thus the second half of the year includes any possible shifts from quarter to quarter. The consolidated report will improve all multiples and more notably P/S and EV/Sales. The share looks attractive with its low P/B that doesn't include revaluation of assets during the last year.

Alcomet /ALUM/

Sales growth during the fourth quarter decelerated further due to the falling prices of aluminum. Moreover, rising depreciation and interest pushed down additionally the profit before tax. EBITDA increased 11% which is below the growth rate of sales. Bank loans jumped by BGN 13 million but payables decreased considerably along with the inventories. Alcomet continued to invest in new equipment. However, profits are too low to improve the P/E ratio.

Bulgarian American Credit Bank

/BACB/

BACB has the best profitability ratios among Bulgarian public banks. The credit portfolio growth is 54% y-o-y. BACB made additional provisions of BGN 5.48m during 2007. The total provisions are BGN 30.68m, whereas credits last year increased from BGN 403.26m to BGN 620.82m. The trailing P/E is below the average for the banking sector and is likely to remain the lowest as the market capitalization of BACB is 16.7% higher than its assets.
