

SPEEDY

INDUSTRY: COURIER SERVICES

MARGINS IMPROVEMENT EVIDENT

FOLLOWING COMPLETION OF EXTENSIVE INVESTMENT PROGRAM, LEADING COURIER IN BULGARIA - SPEEDY, EMBARKS ON OPTIMIZING COSTS AND NEW ASSETS UTILIZATION. INITIAL EFFORTS TURN INTO BETTER MARGINS DESPITE DECELERATION IN TOP LINE GROWTH, YET PROFITABILITY TO FURTHER IMPROVE ON STRENGTHENED ROMANIAN OPERATIONS

TOP LINE GROWTH SLOWED DOWN ON HIGHER PRICES AND CUSTOMER CHANGES

Revenues growth failed to deliver the traditional double digit growth in FY2017. Group sales went up only 7% y/y to BGN 151.3m, mainly on Bulgarian operations. Organic growth on the Bulgarian arm stood at 9% y/y, down from 15% in FY2016, on low summer season, client base restructuring and higher prices. The latter together with operational adjustments hampered growth in Romania, yet client reshuffling was fully offset with SME customers.

IMPROVED OPERATIONAL EFFICIENCY

In H2'17 Speedy improved its operational efficiency with the introduction of a new software system achieving a total of 4% cut in cost of materials for the year. Cost of external services grew slower than revenues - 3% y/y compared to double digit growth in previous years with only labor costs adding 13% y/y on economy wide labor cost pressure in both Bulgaria and Romania. Positive effects as 2016 investments kicked in with higher asset utilization, improved logistics and optimized transportation costs.

PROFITABILITY MARGINS SLOWLY IMPROVING

Profitability margins slowly improved on both asset utilization and cut-down on costs in FY2017. EBIT margin is up 58 bps y/y to 6.36%, net income margin increased 34 bps to 5.04%, close to our estimates. Overall, consolidated EBITDA margin added 97 bps to 13% on strong Bulgarian arm EBITDA margin improvement. The latter posted 18% EBITDA margin for three consecutive quarters in 2017, close to historical averages while Romanian arm still lagging behind. Management expects 18%-20% EBITDA margin in Bulgaria in 2019 while margins in Romania are to double, driven by e-commerce and B2B services in both countries.

CATCHING UP WITH COMPETITORS ON DIVERSIFIED SERVICES

In FY2017, Speedy diversified its services, investing in its put-on network, the latter reaching 360-380 locations, thus matching main Bulgarian competitor Econt. It further built on its parcel lockers services, which are yet to start efficient utilization, expanded its Speedy Post and Speedy Balkan services. International outbound services in Romania expected to accelerate, which coupled with projected 12-18% growth in B2B and above 25% growth in e-commerce in Romania in 2018, is to bring Romanian arm to a solid 3rd place, outperforming its closest competitor Nemo Express in the next 2-3 years.

VALUATION: Based on Speedy's FY2017 results we twitch upward our top line and margin estimates. These result in an insignificant change in our previous target price. Thus, we keep our price target and BUY recommendation. **RISKS:** Further drop in top line growth on aggressive competition and potential economic slowdown.

ANALYST'S COMMENTS

Speedy's FY2017 profitability met expectations on cost optimization and price increases yet top line performance missed expectations with growth decelerating below traditional double digits on customer base reshuffle and new ERP system integration.

Top line performance: Turbulent changes in the customer base held back top line growth, especially in Romania, as Speedy discontinued its operations with major B2C client (10% of sales)- e-commerce company Emag, part of South African internet group Naspers, according to management explanations.

The latter step was taken due to deteriorating profitability margins from the client as well as customer service destruction. However, the negative effect was completely offset in Romania by expansion of target small and medium-sized customer base while in Bulgaria Speedy was able to raise prices which positively affected profitability albeit at a top line expense. Still, increased prices and new ERP system in Romania, in Q4'17, kept growth considerably lower.

Accordingly, consolidated revenues grew only 7% y/y to BGN 151.3m, lower than traditional double digit growth. Domestic revenues in Bulgaria added 9% y/y in FY2017 to BGN 102.8m while Romanian ones were approximately BGN 48.5m, marking a modest 4% y/y growth, much below its FY2016 c.40% y/y surge.

In FY2017, Speedy completed its large scale investment program as a result of which it invested BGN 11m, of which BGN 5.4m was allocated to Bulgarian arm's transport fleet, and the remainder was spent on the modernization of the Company's logistics network, mainly in Romania, as the expansion of the Bulgarian network was financed in 2016. The Company invested in a new ERP system in Romania, mirror-image of its Bulgarian system, which also affected operations, especially in Q4'17.

In 2017, Speedy Post and Speedy Balkans services were the fastest growing segments, yet from a low base. Speedy's core parcels business also kept its pace. International services accounted for 22% share of Romanian revenues, mainly generated by inbound services with great potential on outbound deliveries, and 8% share of Bulgarian revenues. Revenue growth decelerated in H2'17 as Speedy increased its prices in both markets. Additionally, the introduction of a new software system resulted in a further slowdown of Romanian purchases, dragging overall performance down.

The year saw a substantial expansion in Greece, following the opening of the first Greek office in end-2016. In 2017, Speedy was able to reestablish DPD's position on the Greek market, as a result of which Greek operations are expected to further add momentum to the overall performance in the years to come.

Major growth drivers continue to be B2B pallet delivery services and expanding B2C e-commerce segment, the latter expected to grow by 25% in next years on both markets, according to management expectations. Additionally, Speedy further developed its Bulgarian put-on network – points where customers can send/receive parcels, boosting its network to 360-380 locations, thus matching main competitor Econt.

Total delivered packages were up 5% y/y to 26.4 million in 2017.

LEVERAGE UNDER CONTROL

Source: Company data, Elana Trading estimates

Price per consignment was up for the first time in five years - from BGN 5.89 to BGN 6.0 per parcel, mainly on price increase rather than parcel's number growth. The latter forms part of Speedy's two-step strategy to increase the nominal value of prices as well as start pricing services it offered for free. Accordingly, we increase by an inch our top line estimates.

Bottom line results: Further down the line, the annual results conclude that Speedy was focused on efficiency throughout the year as well. The Company was able to cut down on costs of materials and external services, the latter decreasing 3.5% y/y to BGN 6.9m, and the former increasing by only 3% y/y to BGN 94.6m compared to double digit growths in previous years.

Accordingly, margins improved considerably, especially for the Bulgarian arm with the Romanian ones expected to show results at the start of 2018.

EBITDA increased in absolute terms by 15.7% y/y to BGN 20.7 m as Speedy is gradually cutting down on one-offs related to investments realized in 2016 and 2017. The overall group EBITDA margin came at 13.1% for FY2017, which is still below historical averages and slightly below our estimates. However, the Bulgarian arm alone delivered the impressive c.18% EBITDA margin for three consecutive quarters in 2017, averaging to 17.10% for the FY2017 which is close to Speedy's historical averages prior to the acquisition of the Romanian arm. Speedy's management expects the latter unconsolidated EBITDA margins to reach the 18%-20% historical average range in 2018.

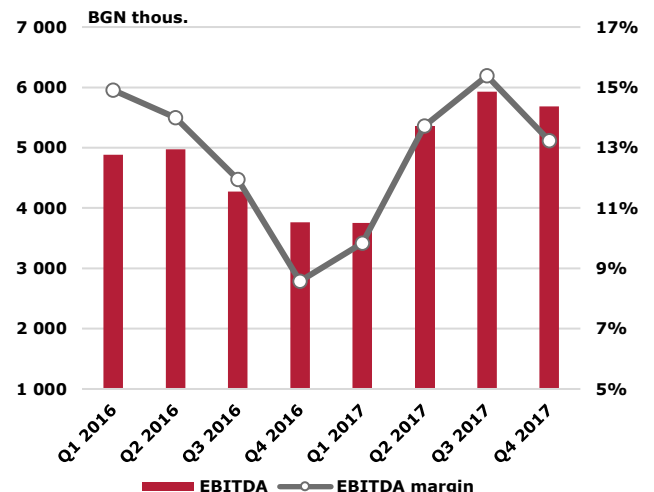

The lower profitability of the Romanian arm, on the other hand, is expected to increase substantially, doubling its EBITDA margin in 2018 on improved customer base, increased prices and capacity utilization as most investments in Romania have already been finalized. Currently, the Romanian arm is operationally profitable, but the final bottom line is still negative.

Nevertheless, the latter translates into improved consolidated EBIT and net income, up 18% y/y and 15% y/y to BGN 10m and BGN 8m, respectively in FY2017. EBIT and net income margins stood at 6.36% (up 58 bps y/y) and 5.04% (up 34 bps y/y), respectively.

Despite heavy investments in 2016 and 2017, Speedy's leverage stays at healthy level, with debt/equity ratio at 0.48 in 2017 (down from 0.52 in 2016). ROE and ROA increased considerably as well to 17.49% (up 184 bps y/y) and 8.58% (up 65 bps y/y), respectively. We expect both metrics to improve substantially starting as of 2018 on full utilization of new assets.

Valuation revision: Based on the 2017 performance we revise slightly upward 2018 top line growth, slightly downward part of the OPEX which results in a slight change in our bottom line expectations. The latter, however, delivers insignificant change in our previous valuation for the stock. Thus, we keep our price estimate and BUY recommendation unchanged.

EBITDA MARGIN IMPROVING ON COST OPTIMIZATION

COMPANY PROFILE

Established 1998, Speedy is the largest courier company in Bulgaria with 37% market share. It is also the 2nd largest postal service provider after the incumbent Bulgarian Post.

The company is also one of the fastest growing companies in the country with high brand recognition. Its core business is door to door standard and express delivery services that represent 95% of the revenues. The double digit growing e-commerce industry has shifted Speedy's service mix from predominant B2B to predominant B2C. Yet, B2B continues to contribute major part of the Company's top line.

In 2014, Europe's 2nd largest land courier service provider GeoPost SA, part of the French La Poste Group, acquired 25% in Speedy at a 8x EV/EBITDA with the option to increase its stake to 70% by 2020. Reversely, Speedy acquired GeoPosts's subsidiaries in Bulgaria and Romania - GeoPost Bulgaria and DPD Romania, with the strategic goal of expanding on the Romanian market. Speedy's founder - Valeri Mektupchian and managers currently are managing the Romanian business restructuring. It aims at transposing Speedy's proven business model in Romania as well.

FUNDAMENTAL STORY

Speedy has gone through the economic crisis with flying colors sustaining a 30%+ ROE thanks to its integrated and innovative product range, flexible operations, skillful management and solid market presence. Heavy investments in Bulgarian and newly acquired Romanian arm ate up part of the Company's profitability over the last three years, averaging ROE to 18%. However, the latter has started to improve and is expected to continue to do so from 2018 onwards. The Bulgarian arm is already close to historical averages while the Romanian one is yet to gain pace in terms of profitability.

The Company adapts fast to market opportunities with innovative products offering both B2B logistics outsourcing services for supply-chain-optimization and B2C delivery services via a wide range of small pickup points all over the country. It also provides door to door deliveries and convenient postal/parcel services with a network of Automated Postal Stations in big retail centers, supermarkets, gas stations, etc.

By joining forces with GeoPost and its DPD network, Speedy is developing its regional expansion goal. It started with Romania - a 3x larger but more fragmented market than Bulgaria. In 2017, it expanded to Greece and offers land deliveries via the DPD network in Europe.

STRENGTHS & OPPORTUNITIES

- Good corporate governance
- Clear dividend policy
- Solid market position in Bulgaria
- Integrated product range
- High growth potential with booming e-commerce
- Excellent brand recognition

SHAREHOLDERS' STRUCTURE

Regulatory Restrictions: No publication of ELANA Trading should be construed as an offer (or solicitation of an offer) to **U.S. persons** to buy or sell financial instruments or any financial product, make any investment or participate in any particular trading strategy (collectively "Offers"). No Publication of ELANA Trading should be construed as an Offer (or solicitation of an offer) in any jurisdiction in which such Offer would be illegal. Any such perceived Offer will not be honoured by ELANA Trading.

Analyst Certification: The research analyst(s) certifies that: (1) all of the views expressed in this document accurately reflect his or her personal views about any and all of the subject securities or issuers; (2) no part of any of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst(s) in this document.

Financial Interest: ELANA trading does and seeks to do business with companies covered in its research reports. This may and includes investment banking services for which ELANA Trading shall be remunerated. ELANA Trading may trade or own shares of the analyzed companies. The research analyst, author of this report, is not in possession of significant financial interest in Speedy in accordance with Art. 17 of the Law on Measures against Market Abuse with Financial Instruments. As a result, investors should be aware that ELANA trading may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Regulatory Authority: Financial Supervisory Commission, *Budapest Street 16, 1000 Sofia, Bulgaria*

Information Disclosure: All reasonable care has been taken to ensure the facts stated are accurate and opinions given are fair and reasonable. Our recommendations are based on information available to the public that we consider to be reliable but for the completeness and accuracy of which we assume no liability. Neither ELANA Trading, nor its directors, officers or employees shall in any way be responsible for its contents. The views expressed may differ from the views of other firm departments or representatives. Additional information is available upon request. Unless otherwise noted, sources for all information in charts and tables are ELANA Trading's calculations.

Risks for Investors: Information in this document should not be regarded as an offer to buy or sell any financial instruments. The investment possibilities discussed in this document may not be suitable for certain investors depending on their specific investment objectives and time horizon or in the context of their overall financial situation. In particular, the risks associated with an investment in the securities or the financial instruments under discussion are not explained in its entirety.

The prices or values of the securities may go down as well as up and can fluctuate and fall against the investor. The securities or investments may cause the investor to lose the amount invested. Past performance is not a guide to future performance. Changes in exchange rates may have an adverse effect on the value, price or income of the securities or investments.

Valuation Methods: Company valuations are based on the following methods: multiple-based (P/E, P/B, EV/EBITDA), historical valuation approaches, peer comparisons, discount models (DCF, DDM) or asset-based evaluation methods. Valuation models are dependent on macroeconomic factors, including interest rates, foreign exchange rates, prices of raw materials, and any expectations about the economy, the market sentiment. The valuation is based on expectations that might change rapidly and without notice, depending on developments specific to individual industries and countries. Recommendations and target prices derived from the models might therefore change accordingly. The application of models depends on forecasts of a range of economic variables, thus there is a range of reasonable variations within models. Any valuation is dependent upon inputs that are based on the subjective opinion of the analysts carrying out this valuation.

Recommendations: Analyst(s) recommendations are based on the specific factors for the company, sector, country and global developments, as compared to market indices. Recommendations and opinions reflect ELANA Trading's expectations over the 12-month period following publication from the perspective of long-only investment clients. ELANA Trading reserves the right to express different or contrary recommendations and opinions for different timescales or for other types of investment client. Except as otherwise noted, expected performance over next 12 months vary for different recommendations for Bulgarian stocks as follows:

BUY	Target price is more than 10% above current quotes
HOLD	Target price in +/-10% range of the current quotes
SELL	Target price is more than 10% below the current quotes

Frequency of Recommendations: No schedule of recommendations is available. The frequency of recommendations depends on specific factors to individual companies and the opinion of the analyst(s) for the necessity of minor or major changes.

Q4 2017 Recommendation Review			Market Maker Services
